Don't get involved in cybercrime

The NCA and Police take cybercrime very seriously. We work with national and international partners to investigate cyber criminals. If you get involved you could face the following consequences:

- A visit and warning from Police or NCA Officers
- Being arrested
- Having your computer seized and internet access restricted
- Paying a penalty or fine
- A significant prison sentence

A permanent criminal record could affect education and future career prospects, as well as overseas travel.

Cybercrime is not a victimless crime, imagine how you would feel if someone illegally accessed your private and personal information, could control your computer, or stop you using the internet.

A Guide to the Computer Misuse Act 1990 (CMA)

#CyberChoices

The Computer Misuse Act 1990, makes the following actions illegal:

Offence	Example of potential unlawful activity
Section 1 > Unauthorised access to computer material	Without them knowing, you watched your friend put their password into their phone. You then used it to gain access to their phone and download their photos
Section 2 > Unauthorised access with intent to commit or facilitate commission of further offences	Without their permission, you accessed your friend's smartphone, obtaining their bank details, so you could transfer money from their account
Section 3 > Unauthorised acts with intent to impair, or with recklessness as to impairing, operation of computer	You used a booter tool to knock a friend offline from an online game
Section 3ZA > Unauthorised acts causing, or creating risk of, serious damage	You hacked into the computer system of a Government Agency and were reckless as to the consequences. National security was undermined
Section 3A > Making, supplying or obtaining articles for use in another CMA offence	You downloaded a product to deploy malware to a friend's computer, so you could control it. You didn't even get the chance to use it
